LEBLANC ILLUMINATIONS, SUSTAINABLE EMOTION CREATOR THROUGH LIGHT

The most beautiful emotions, are the ones which we share.

Meeting around a decorated Christmas tree, strolling through decorated shopping streets, enjoying the illuminated streets of a historic city centre, taking selfies among festive decorations, posting your Christmas list into Santa's letterbox.

We all remember those moments when we talk about Christmas, memories enhanced by the magic of the lights.

Our illuminations spark human emotions and demonstrate values shared with our customers, employees and the wider audience.

INNOVATION

SHARING

RESPONSIBILITY

COMMITMENT

TRANSPARENCY

65 YEARS AGO, LEBLANC INVENTED CHRISTMAS LIGHTS

In 1958, in a small village in the East of France, **Michel Leblanc invented the first street decorations**. Previously a theatre decorator, he had the idea of fixing a porcelain socket with a star made from wood. This was the first illuminated decoration, and the Christmas lighting market was born. **Since then Leblanc illuminations has nurtured its pioneering spirit**, aligned with the concerns of society: Leblanc illuminations was the first to use aluminium structures in the 1960s, the first to replace incandescent bulbs with LEDs in 1996, the first to invent a timing control box for illuminations in 2014. In modern times it is the **use, reuse and recycling** of materials that Leblanc illuminations is leading the way, thanks to its fleet of **3D printing robots**.

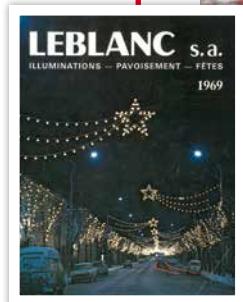

Mastering everything to guarantee everything.

We design and manufacture 100% of our decorations in our own production sites, without subcontracting. It is because we control our entire production chain that we can guarantee you the highest quality and total peace of mind.

2023

1958

OUR DECORATIONS CONNECT PEOPLE

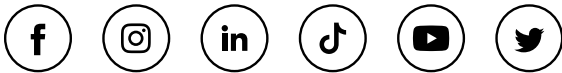

Creating moments to experience and share together.

Our decorations bring people together and bring moments of joy to the eyes of those young and old.

We want to create links which people live, experience and share together. Experiences which connect people and bring people together.

With our LEDs, we illuminate our public, our customers and our employees.

Connect with us on social channels and become part of our network.

Discover Pau's point by point controlled marquee, installed at the Christmas market.

ALWAYS THERE FOR YOU AND YOUR PROJECT

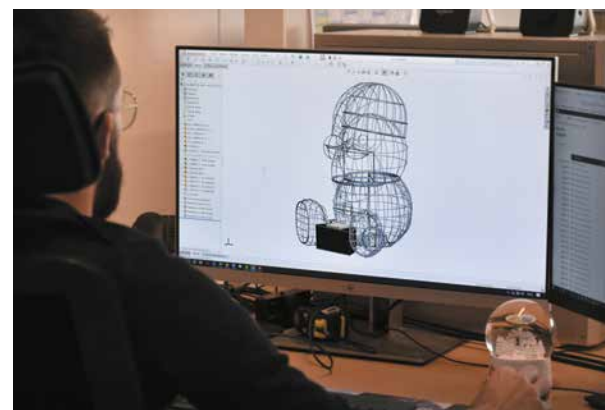

We are a family with an open mind and inclusive spirit.

With us, you'll feel at home, and you will never be alone: we are by your side at every step of the project, from the idea's conception to its implementation and successful realisation. Every light is switched-on in time, thanks to our good working practices.

When you trust us with a project, the whole company is committed to your project.

Besançon

			
3,473 kWh Power consumption	180 h Time of use	868 € Estim. overall cost	0.007 € Cost per capita

Did you know?

We calculate the energy consumption of your decorations for you.

We provide you with graphic and educational materials, and help you communicate with the public.

Pau

100% LED	 215 decorations	 17.71 kWh Total power	 3,843 kWh Power consumption
-90% power consumption	 217 h Time of use	 769 € Estim. overall cost	 0.01 € Cost per capita

MAKING THE HEART OF CITIES BEAT

Illuminations bring happiness to people and boost economic activity. In today's environment we understand that a collective effort is required to reduce energy consumption.

At Leblanc illuminations, we have solutions to make the holidays magical and responsible.

As a long-standing partner to local authorities, businesses and professionals, we know how to support our customers in their efforts to be responsible. We offer advice and solutions to make energy and budget savings.

LEDs: the solution to reduce power consumption by more than 90% .

We were **the first manufacturer to use LEDs** on our decorations from 1996. Using LEDs on our lights was **a technical revolution** that enabled us to **reduce the power consumption of our illuminations by more than 90%**.

LEDs are used on **100% of Leblanc illuminations decorations**.

Remote-controlling the times your lights are illuminated, rather than simply turning them on for the full season, is an innovation that considerably reduces the electricity consumption of the decorations and therefore display overall.

In 2014, we invented a control unit, designed and manufactured in France. Easily installed on each decoration, this box is connected to an app that controls the illumination of the lights remotely. You can therefore choose to switch on your illuminations only when the streets are busy, and reduce electricity use and energy consumption.

Better informing our customers about the power consumption of our equipment decorations is part of our service, to help inform your choice.

THE MOST CERTIFIED MANUFACTURER IN ITS SECTOR

ISO 9001 & CSR 26000

Our actions are independently reviewed and certified against social and environmental best practice. We are more committed than ever to improving our products, reducing our environmental impact and delivering high standards of customer satisfaction.

This is an ongoing commitment, independently recognised by **ISO 9001 certification since 2014**, and confirmed by the **CSR 26000 label achieved in 2021**. In 2022, **Leblanc illuminations joined the Coq Vert community**, initiated by BPI France, ADEME and the Ministry of Ecological Transition, which brings together companies that place environmental issues as a priority in their strategy.

This is the result of the long-term involvement of all our teams, and investments in our production facilities.

Leblanc illuminations is the only European manufacturer that is

- **ISO 9001 certified**
- **CSR 26000 certified**
- **member of the Coq Vert community**
- **which manufactures in Europe without subcontracting**

**We are proud to be the most certified
company in our sector!**

THE LEADER OF RESPONSIBLE ILLUMINATION

Leblanc illuminations is committed to a continuous and voluntary process of reducing its environmental footprint:

We do not follow trends, we create them!

We did not wait for the recent social and environmental awareness to commit ourselves to being environmentally conscious, it has been with us for over 65 years.

Today's decorations are the raw material for tomorrow's decorations.

We innovate to reduce, reuse and recycle our materials: our structures are made from Hydo-Reduxa low-carbon aluminium, which is infinitely recyclable. Our 3D robots print motif details in bio-based and/or recycled materials, which are recycled for new prints at the end of their life. We recycle and recover 97% of our designs.

We invented the Christmas lights market. Now it's our turn to reinvent it!

Leblanc illuminations has pioneered the Christmas lighting market since 1958. We were also the first to integrate LEDs into our designs in 1996, before switching to 100% LED decorations in 2006. We were also the first player in the sector to be awarded a CSR label. All these actions combined with the hundreds of human stories we experience on a daily basis, are testimony to our continuous commitment.

With more than 3,000 different products in our catalogue and the largest range of 3D decorations, Leblanc illuminations is still today a source of innovation that develops lighting solutions with passion and excellence. French know-how recognised internationally. More than ever Leblanc illuminations creates sustainable and ever more responsible decorations for its French and international customers.

The world is changing, and Leblanc illuminations is changing with it. So that the magic of Christmas continues ...

CORPORATE SUPPORT & SPONSORSHIP

Bringing the magic of Christmas to hospitals

The holiday celebrations reflect sharing and generosity. For more than 10 years, to put a smile on the faces of young and old, Leblanc illuminations and Les Blouses Roses have been working together. Together, we offer hospitalised patients a Christmas full of lights by decorating their care areas.

Already **43**
hospitals are lit up

in the colours of the Blouses Roses every year.

The Blouses Roses Association

The mission of The Blouses Roses, created in 1944, is to bring comfort, listen to and entertain people who are sick, elderly or disabled, by means of entertainment.

www.lesblousesroses.asso.fr

Leblanc illuminations supports its employees

In 2022, Leblanc illuminations created the «Leblanc Sponsoring» commission to **support the company's employees who are who are involved in sports and association projects.**

Nine projects have already benefited from financial or material aid, including the association Up2dance, chaired by Laura Leproux, daughter of Sylvie Leproux, one of our manufacturing team. **Up2dance** is a sports association that offers dance classes for children, teenagers and adults.

As a thank you, the association performed a sparkling choreography in our showroom.

Don't miss the video of the Up2dance choreography in our showroom

and on TikTok

Eight years of Ski Cross

Already a partner of leading French ski resorts, **the French Ski Cross Federation and the French Ski Cross Team since 2016**, we have again renewed our partnership to last **until 2024.**

Leblanc illuminations is also committed to young skiers by supporting several ski schools.

Photo courtesy of the Club des Sports of Notre-Dame-de-Bellecombe, France.

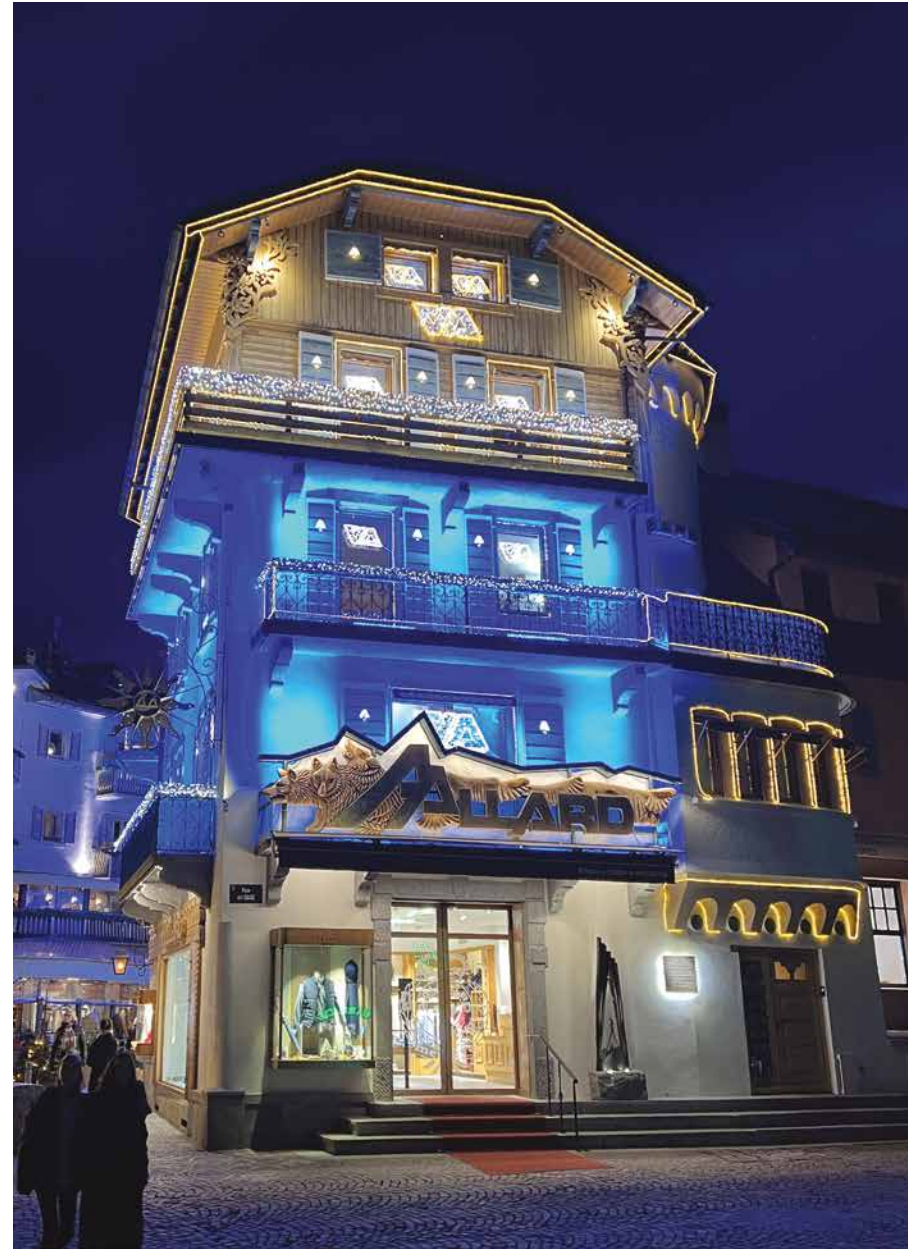

It is with pride that Leblanc illuminations has been **the official partner of the Christmas lights in Megève**, at the heart of the Alps, **since 2017**. The lights are switched-on in front of 5,000 people each December, with the illumination of the famous Christmas tree in Place de L'Eglise.

ESSENTIAL

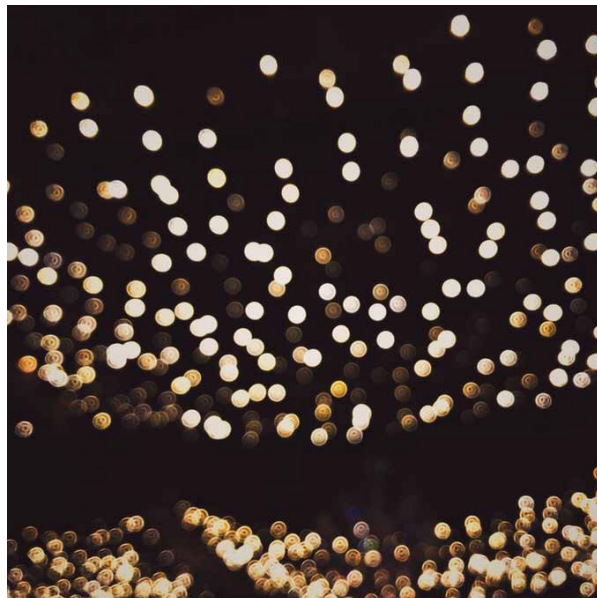

ESSENTIAL decoration

Our collection of ESSENTIALS relies on **optimized and streamlined design**: Simple shapes, raw materials, and the daytime decorations which are confined to key materials. The decorations are equipped with rope lights 36 LED/m certified and patented, their brightness is excellent. They are supplied without junction box, with 3 m disconnectable supply cable.

As all our collection of lighting decorations, the ESSENTIALS can be placed horizontally and vertically. They offer a wide range of sizes, colours and animations. It is possible to combine our different collections with each other.

All our decorations are made with 100% LED, delivered with power cables & fastening kits, without bulbs and satellites. All our floorstanding 3D decorations are cabled in SELV, except for non-suitable products.

TRANSFORMERS 230V AC / 24V DC

REFERENCE	DESCRIPTION
550514	Transformer 0.5 A max. (12W/24VDC) at output

REF.	DESCRIPTION
061218	Transformer 1.25 A max. (30W/24VDC) at output
061219	Transformer 2.5 A max. (60W/24VDC) at output
061220	Transformer 4 A max. (96W/24VDC) at output
550628	Transformer 6.25 A max. (150W/24VDC) at output
550336	Transformer 2x 6.25 A max. (2x150W/24VDC) at output

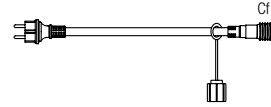

Ref.550514: Works in AC or DC.
Connector input Ø 2.35 mm.

This reference is ideal for powering our 24V P&L suspensions.

⁽¹⁾ Products with rubber cable.

CUSTOMISED GOBOS

On request, we can create your personalised visual

from your image (photo, logo, ...), either in colour or black and white and adaptable to all our projectors. We have also designed a collection of gobos, adaptable in black and white or in colour, in adequacy with our decors, for a total unity in your project.

NEWTON 210 HD+

The perfect ally for your architectural lighting.

This cut-out spotlight is equipped with a 250 W RGBAL LED. Equipped with 4 manual knives, and a motorised zoom/focus from 15° to 30°, you will be able to illuminate with precision wherever you want. Its rotating gobo holder even allows it to project your logo! White macros ranging from 2700 to 8000°K and color macros are integrated to the projector. It also features Wireless Solution technology, allowing wireless DMX management.
Gobo: OD 66 mm / ID 60 mm.
